The Role of Local Administration in Limiting the Spread of Corona Virus, COVID-19

- 6 pillars are used to limit the spread

1. Strengthening the role of crisis and disaster management in the governorates and coordinating between all concerned parties

2. Anticipating and managing the health crisis to contain the epidemic

3. Ensuring the provision of basic services

4. Supporting vulnerable groups and providing basic services in informal areas

5. Establishing an institutional and financial management capable of dealing with the variables resulting from COVID-19

6. Developing a plan to recover the economy and build local capacities to deal with future natural risks and crises
